THE ART OF MEDICAL DESIGN

NEO Chair

For You and Your Patient

How About Having a Dental Chair That Has It All?

Many dentists prioritize their own comfort when choosing a new chair, while patients emphasize better comfort during their 30–60 minutes in the chair. Unfortunately, many patients leave practices feeling uncomfortable, which increases the risk that they won't return.

This comprehensive understanding of both patient and dentist needs has led Fimet to develop a solution that satisfies both.

The dental chair is the centrepiece of the dental practice. It's the first thing a patient sees when entering the practice. Along with the dentist's smile and welcoming words, the practice itself should look inviting, proper, fashionable, and—most importantly—equipped with a comfortable patient chair.

NEO Chair

For You and Your Patient

Where Comfort Meets Innovation

Designed for oral surgeries and everyday procedures, it ensures maximum comfort for your patients and efficiency for you—transforming your practice into a space where everyone feels cared for.

State of Art Ergonomics

Exceptional patient comfort with memory foam upholstery and easy adjustments. Ergonomically designed for long hours of use, making your workday more comfortable.

MDR- level of durability

Durable and MDR-certified, built to withstand the demands of a busy practice.

Best Efficiency

- Quality: Dentists cannot afford low-quality chairs, especially when their waiting room is fully booked.
- Compact: A small base provides more working space for both the dentist and assistant.
- Seamless upholstery: Easy to clean and available in many attractive colors to enhance the practice.
- Height adjustment range (45–95 cm) supports working in both sitting and standing positions.
- Knee-break for easy patient entry and exit, either from the front or the side by turning or removing the armrest.
- Chair rotation: The patient can be brought close to essential tools, such as X-ray machines, scanners, and work surfaces.

Best Comfort

- Provides maximum comfort to patients during treatments.
- Comfortable upholstery (memory foam) helps relax patients during procedures.
- The magnetic headrest enhances the already wide reach of Fimet’s adjustable headrest.
- Easy access to the chair, especially for elderly and handicapped patients.
- Two-joint adjustable headrest for better positioning and comfortable head support.
- Happy, comfortable patients are more likely to return for future visits.

The Details that Make a Difference

Innovations that enhance both patient care and your daily practice.

A sleek, small base provides more space in your working area, allowing you and your assistant to move around with ease.

Rotation and Knee-Break Mechanism

The chair's rotation and knee-break features make it easier to maneuver patients into position, ensuring comfort and convenience for both you and them.

Wireless Foot Control

Fimet's horizontal and vertical footcontrollers provide a seamless working experience.

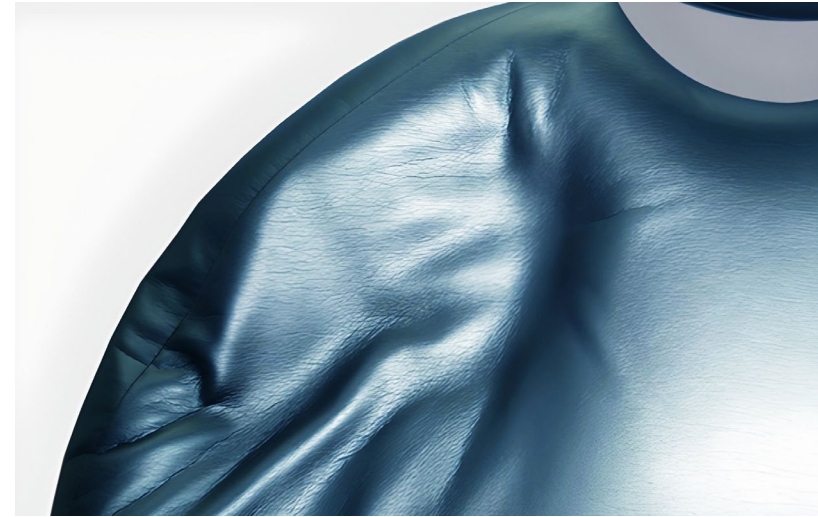

Versatile Configurations

Choose a standalone chair for surgery rooms, or integrate with the Neo Cart, Neo Unit Chair-Mounted System, or Neo Ceiling Unit for a more connected setup.

Attractive and durable

Seamless fabric and durable memory foam in many attractive colors, ensure relaxation even during extended treatments.

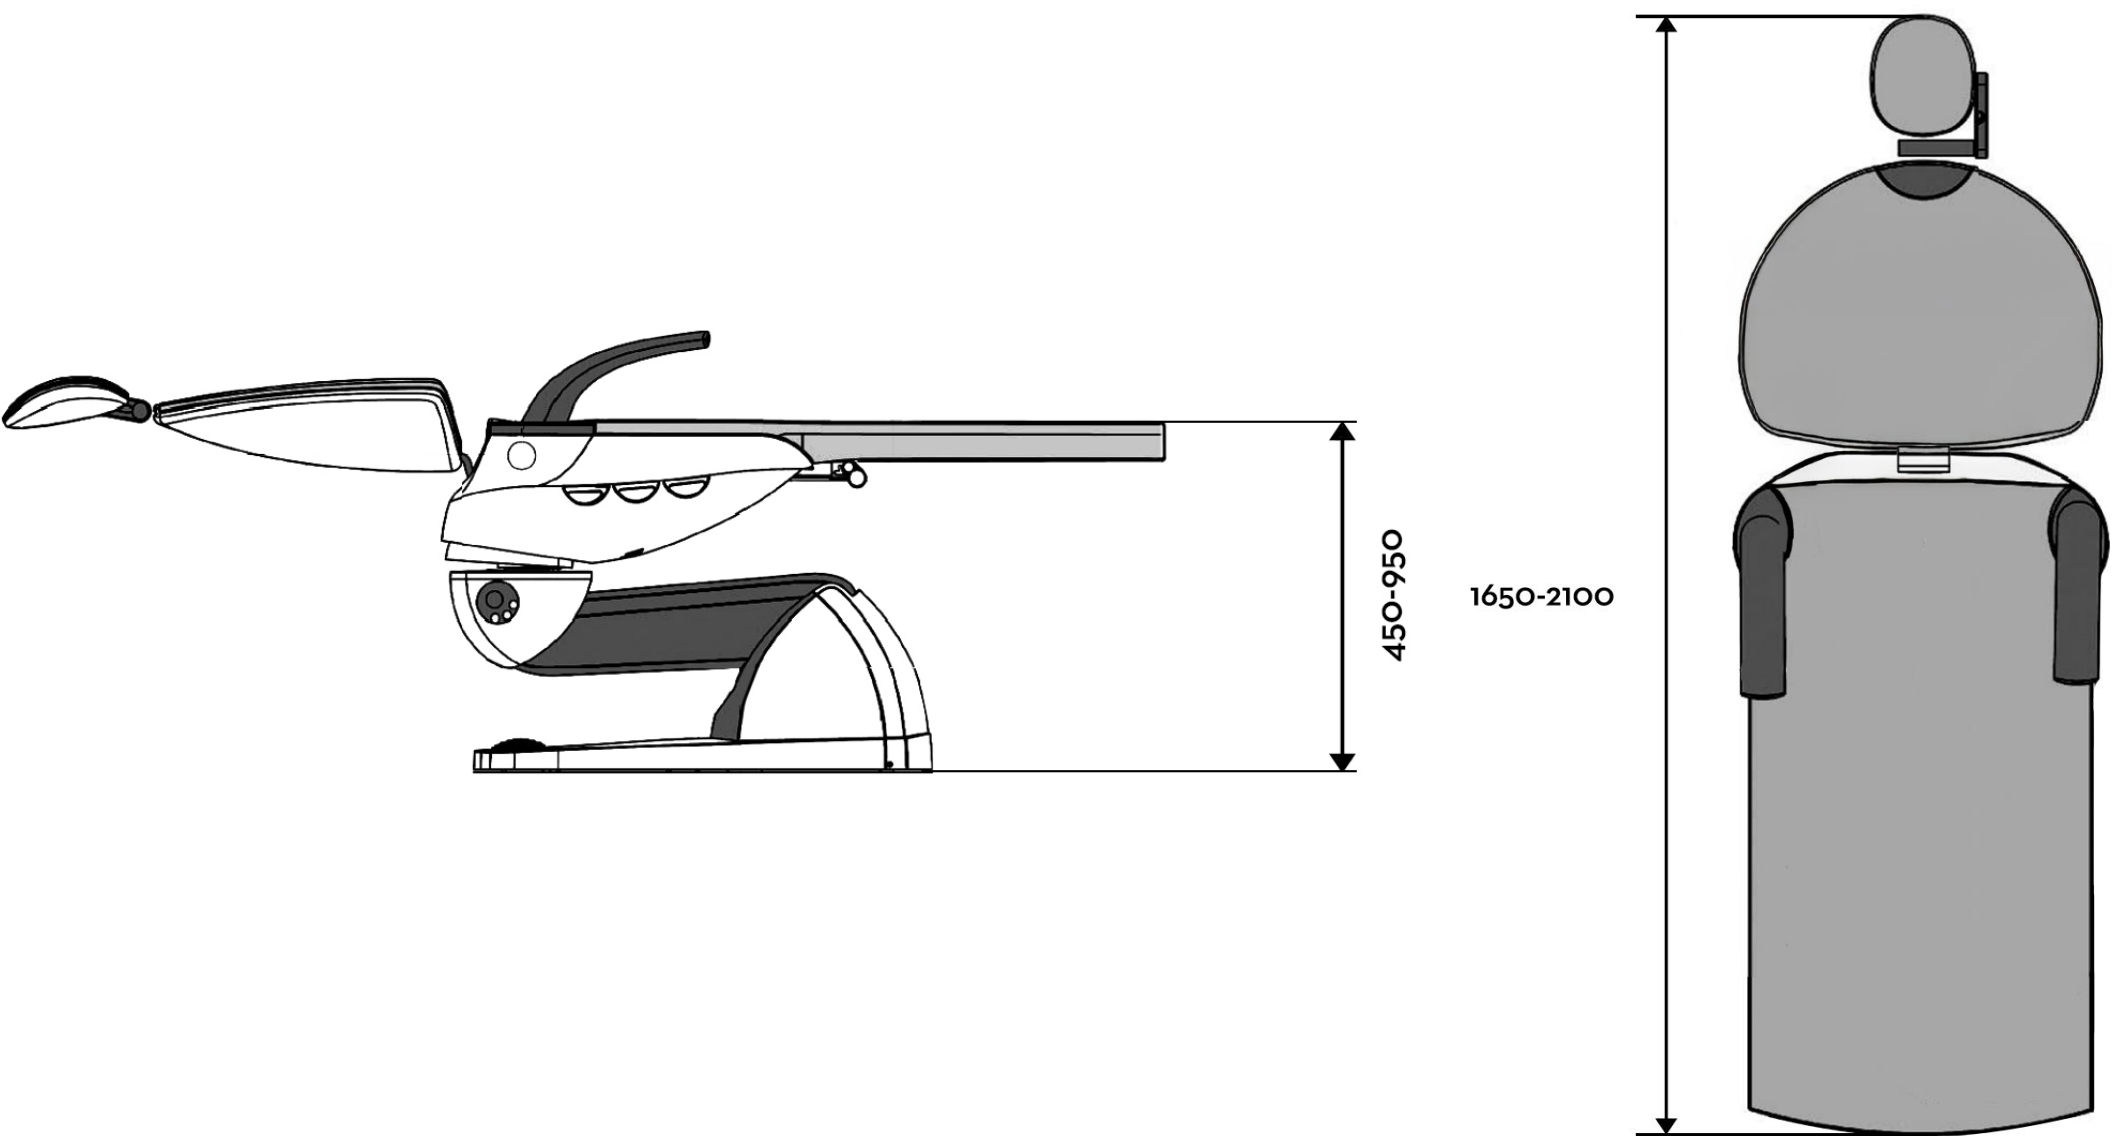

Perfect for oral surgery operations

Designed for Precision, The Ultimate Dental chair for Oral surgeries

This dental chair provides stable positioning and smooth adjustments, making it ideal for oral surgery operations. Its durable design ensures precision and comfort during procedures.

Compact, easy to clean and allows the practitioner to work in a standing position, with its impressive 95 cm height.

NEO Chair

The Fimet Neo Dental chair, perfect balance of comfort for patients and dentists.
